27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: <b>The communities of Hickox, Racepond, Hoboken and Nahunta. State, private and commercial timberlands. The Okefenokee Wildlife Refuge. Hwy 94, 301, and 1 are threatened to closure with increased fire activity. 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: <b>15 Engines, 3 TFLD and 1 DIVS</b> 24 hours: <b>15 Engines, 3 TFLD and 1 DIVS</b> 48 hours: <b>15 Engines, 3 TFLD and 1 DIVS</b>						

72 hours: **15 Engines, 3 TFLD and 1 DIVS**

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

**Extremely dry conditions make control difficult, spotting, large area of uncontrolled fire line, Thunderstorm activity with little rain. Firefighter fatigue. Sea breezes pose difficulties in line containment. Reburning due to needle fall in areas that were previously burned.**

30: Observed Weather for Current Operational Period

Peak Gusts (mph): **15** Max.

Temperature: **99**

Wind Direction: **W** Min.

Relative Humidity: **38**

31: Fuels/Materials Involved: **7 Southern Rough Palmetto, Gallberry, Titi, pine straw, hardwood understory**

32: Today's observed fire behavior (leave blank for non-fire events):

**Fire behavior increased today due to drop in relative humidities and continued reduction in fuel moisture. Reburning in needle cast that has fallen in previously burned areas.**

**Reburning will continue as straw continues to fall. Experiencing 3-4 foot flame lengths.**

33: Significant events today (closures, evacuations, significant progress made, etc.):

**Significant progress was made with line improvement and installation of new control lines.**

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **5-10** Temperature: **98**

Wind Direction: **W then E** Relative

Humidity: **39**

35: Estimated

Control

Date and Time:

**06/25/2011 1400**

36: Projected Final

Size:

37: Estimated Final

Cost:

38: Actions planned for next operational period:

**Continue to complete control line and improve existing ones on the east and south flanks.**

**Secure the Racepond Community and mopup around the Fort Mudge Community.**

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**

2. Difficulty of Terrain - **Medium**

40: Given the current constraints, when will the chosen management strategy succeed?

**Without a significant rain event, control is unlikely in the near future.**

41: Projected demobilization start date:

42: Remarks:

**Fire activity and spotting has increased in the Sawfly fire, which is threatening the southwest edge of the Racepond fire. This includes the Okefenokee Swamp Park.**
